DIFFERENTIATORS

COMMITTED EXPERTS

Method Automation's principals stay engaged in every project, ensuring strong oversight and delivering real, tech-driven results that help clients become customer-focused digital organizations.

LOCAL ACCOUNTABILITY

With our office in New Kensington PA only 4 hours from Washington DC, Method Automation is prepared to respond quickly and in person.

COMPREHENSIVE QUALITY

Method Automation's quality is driven by industry-leading frameworks, a team committed to reducing risk in software and service development, and continuous client feedback assessments.

FLEXIBLE ARCHITECTURE

Method Automation builds cross-platform, cross-device systems with automated deployment, offering COTS solutions from input testing to user-friendly database tools that run on any device.

AUTOMATION

Method Automation evaluates processes to eliminate non-value-added steps and prevent erosion, using advanced workflow and robotic process automation to deliver efficient, stable, and user-focused solutions.

CERTIFICATIONS

Nintex K2 Master Developer

PAST PERFORMANCE

"This is beautiful and product support was amazing."

South Side Area SD

"I have no hesitation in recommending MAS to any organization seeking high quality software development services."
